

SANKALP VATS

EDUCATION

Indian Institute of Technology (BHU), Varanasi <i>Bachelor of Technology in Chemical Engineering</i>	<i>2024 - 2028</i> <i>8.80</i>
ST. FRANCIS SCHOOL SHAMLI <i>Council for the Indian School Certificate Examinations</i>	<i>2024</i> <i>96.60%</i>
ST. FRANCIS SCHOOL SHAMLI <i>Council for the Indian School Certificate Examinations</i>	<i>2022</i> <i>97.60%</i>

SKILLS

- **Languages:** C++, TypeScript, JavaScript, Python, SQL
- **Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, Tailwind CSS
- **Databases & ORM:** PostgreSQL, MongoDB, Prisma ORM, Supabase
- **Authentication & APIs:** Firebase Authentication, JWT, REST APIs
- **Developer Tools:** Git, GitHub, Postman, Vercel
- **Core Subjects:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

INTERNSHIPS

Tripflow <i>Frontend developer</i>	<i>Tripflow May 2026 – July 2026</i> <i>Remote</i>
• Contributed to frontend development of an AI-powered travel planning platform using Next.js, React, and Tailwind CSS. • Assisted in developing and refining responsive UI components while following modern frontend development practices. • Collaborated with the engineering team to implement and test frontend features, improving user interface consistency and usability. • Worked with Git-based development workflows and participated in feature integration and code maintenance.	

PROJECTS

CodeSync – AI-Assisted Real-Time Code Collaboration Platform	<i>GitHub Repository · Live Demo</i>
• Built a full-stack real-time collaborative code editor using MERN, Socket.IO, and Monaco Editor, enabling low-latency multi-user code synchronization. • Implemented Firestore Authentication and JWT-based authorization with protected routes and persistent user sessions. • Integrated an AI code assistant using the OpenRouter API for code review, debugging, optimization, and explanations. • Developed features including live code execution, synchronized I/O, room management, and deployed on Vercel, Render, and MongoDB Atlas.	
Whispr – Anonymous AI-Powered Matchmaking Platform	<i>whispr</i>
• Developed a full-stack anonymous matchmaking platform using Next.js 16, TypeScript, Prisma ORM, PostgreSQL (Supabase), and Firebase Authentication, following a modular service-repository architecture. • Implemented Google Sign-In, Phone OTP, JWT-based authentication, email verification, and protected REST APIs for secure user management and session handling. • Designed a multi-step onboarding workflow with React Hook Form and Zod, enabling structured user profiling, preference collection, and robust input validation. • Built a responsive UI with React, Tailwind CSS, and Next.js App Router, while integrating Resend Email API for transactional email verification.	

ACHIEVEMENTS

- **Achieved the Specialist title on Codeforces** with a peak rating of **1430**, demonstrating strong problem-solving and algorithmic skills.
- **Secured an overall rank of 2300** in a **Codeforces Div. 1 + Div. 2** contest among thousands of global participants.
- **Attained a LeetCode Contest Rating of 1543**, placing in the **Top 33.65%** of competitive programmers.
- **Solved 419+ algorithmic problems on LeetCode** across Easy, Medium, and Hard categories, showcasing strong proficiency in Data Structures and Algorithms.
- **Participated in CTRL + SHIFT + INTELLIGENCE (COPS Week '25)**, a competitive programming event organized by the **Club of Programmers, IIT (BHU) Varanasi**.
- Developed an **ML-powered API Traffic Intelligence** platform during the **BNY Hackathon**, leveraging **Prophet-based forecasting**, **feature engineering**, and **Streamlit** to analyze **6 months of production API logs** and generate **predictive scaling recommendations**.

POSITIONS OF RESPONSIBILITY

Served as a **Technical Executive at Spardha'25**, developed and maintained the **eSpardha** portal, and managed backend updates for match schedules and team information across multiple sports.
